

Dear Editor(s),

As requested, we have addressed the following technical corrections:

Line 134: I guess a "the" is missing before "mass addition component"

Lines 219-221: the sentence reads a bit awkward, please enhance

Lines 225-228: Please separate into two sentences.

Line 556: I'd delete the text "(such as the 20-year time slices used here)", not needed

Please let me know if you need any other corrections, materials or information.

Cheers,

Ron
