

**The article merits to be published after the implemented changes and corrections. However, I have a specific comment about the abstract, which is the 'front' page and has to be correct, precise and attractive.**

**Specific comment:**

To my experience the phrase 'High spatiotemporal database' is not appropriate and does not mean anything. The authors probably mean High spatiotemporal resolution flood database or Flood database of high spatiotemporal resolution.

Please consider revising.

Thank you for your efforts.
