Dear editor, dear reviewers,

On the 21 of September 2019, we have submitted the rebuttal letter regarding the manuscript 'Estimates of tropical cyclone geometry parameters based on best track data'. However, it has come to our attention that in that manuscript, two typos were present. - In Equation 4, we flipped the sigma and mu symbol. - Figure 6 should be AR35 instead of delta AR35. Also, we have changed a few reference to this figure.

In the attached manuscript we have corrected these typos.

Kind regards,
