

Review of the paper by A.Maramai et al " Italian Tsunami Effect Database"

The paper describes structure and the data content of the ITED (Italian Tsunami Effect Database) that was created as a supporting part of the EMTC (Euro Mediterranean Tsunami Catalogue) database. The data on coastal tsunami manifestation, compiled within the ITED, have been collected from a variety of published and archival sources and were carefully revised. They are extremely important for assessment of tsunami hazard along the Italian coast. The paper is written in a compact and informative manner and can be published as it is, after several minor corrections listed below.

Page 4 line 4

Reference for (Guidibini et al., 2018) is absent in the Reference list.

Page 4 line 33

"... where inundation values are specified,..." . " values" is a very general term, it should be replaced with more specific term like "extent" or "distance"

Page 5 line 35

Reference for (Guidibini et al., 2018) is absent in the Reference list

Page 6 line 13

The indicated web-reference does not work

Page 6 line 14

"the OP" should be types as "OPs"

Page 8 line 35 (References)

Is the paper (Platania, 1909) written in Italian? In this case "(in Italian)" should be added to its reference

is not mentioned in the text

Page 12 line 3 (in caption to Figure 3)

webApp should be typed as WebApp (as in the text)

In some places, the English should be polished **up** (several examples are below):

"being affected during times" (page 5 line 4)

"accordingly to the new achieved info" (page 5 line 27)

"About the 1690 event, ..." (page 5 line 35)

"provoking victims" (page 5 line 36)

"respect to EMTC" (page 6 line 4)

"struck localities" (page 6 line 15)

"The events... are divided into 4 main causes" (page 6 line 35)

"filtering expressions" (page 7 line 8)

"also distant sources, including in ITED also the effects produced on the Italian coasts" (page 7 line 29)
