

Dear Editor,

As you can see in the manuscript and according to the Referee#1 (Report#2) we have made the two small changes indicated to us:

*"1. On line 328 where it says, "the best behavior is shown by the PMT CHU..." the sub index should be CUH and not CHU.*

*2. In table 3, in the last column, it should be ET0 FAO56, mm.d-1."*

We have detected that in figure 7 the letter G of a map was omitted and we have include this letter.

We have change Fig. by Figure in Figure 5, 6 and 7.

Bests Regards
