Interactive comment on "The 22 December 2018 Mount Anak Krakatau Volcanogenic Tsunami on Sunda Strait Coasts, Indonesia: tsunami and damage characteristics" *by* Syamsidik et al.

Anonymous Referee #1

Received and published: 3 September 2019

The paper describes the effects by the 22 December 2018 generated from the Mount Anak Krakatau. The research presents collected data and interview carried out in the following days to the tsunami. The data are clearly reported but the readability of the paper could be improved in some point adding tables, figures and some clarification in the text. A revision of English is needed.
