We would like to thank reviewer #2 for his positive feedback on our revised manuscript. We revised the wording of the last section in the conclusions and checked the grammar of the whole MS again. At this point we would like to mention our high appreciation of the first constructive review provided by the reviewer, which helped to improve the MS a lot.

We would also like to thank the editor Paolo Tarolli for his positive feedback. We changed the figures according to his advice.

With kind regards on behalf of all authors,

Heiko Apel
