

Comments on “Trends in social vulnerability to storm surges in Shenzhen, China” by Yu et al.

The authors mentioned few limitations of this study in their response. It might be beneficial to include these limitations in the manuscript. For example, the authors’ response to “Page 11, lines 314-319” (Now Pages 11-12, lines 322-326).

Figures 6, 7: The authors could include the normalization approach that they used in the manuscript, as there are several normalization approaches.
