Received and published: 13 December 2019

We thank Anonymous Referee #1 for reviewing our manuscript “A methodology to conduct wind damage field surveys for high impact weather events from convective origin”. We believe that the comments provided identified points which were not clear enough and also helped us to reconsider the structure of the text.

Please, see the Supplement file attached, where it is provided an item-by-item reply to Referee #1 comments.

Please also note the supplement to this comment:
