We thank Referee 1 for the feedback provided. All the comments and the suggestions were useful to improve the quality and the readability of the paper. Detailed responses to each comment together with the changes that will be done in the revised version of the manuscript are reported in the attached supplement.

RC indicates the referee comments, AC the authors comments. Where useful, we reported both the original manuscript's text and the authors changes to the manuscript to help referees to visualize the changes that will be done in the revised version of the manuscript.

C1
