Interactive comment on "A spatial decision support system for enhancing resilience to floods. Bridging resilience modeling and geovisualization techniques" *by* Charlotte Heinzlef et al.

Anonymous Referee #2

Received and published: 20 January 2020

It would be appropriate that the author illustrate with greater clarity the resilience indicators shown in Table 1. In particular, it should be clarified, especially with reference to urban resilience, if these indicators constitute a reference applicable in different locations and, if so, why.

Figure 9 uses colors whose meaning is illegible and makes interpretation of the results difficult.

Overall, the article is clear and deals with a topic of sure interest for the scientific community
