Received and published: 24 March 2020

We thank the reviewer, Prof. Jullian Bommer, for his efforts in reviewing and improving our manuscript. We have tried to address each of his concerns in the attached document. However, some comments should be placed in the context of the revised manuscript, which will be uploaded after this discussion. In formulating our response to Professor Julian Bommer's review, we also responded indirectly to Dr Georgios Michas' review. Therefore the following document contains both answers.
