Thank you for your comment. it was an oversight that these studies where not already cited in the manuscript. We have now added reference to the coastal setting, noted in Aránguiz et al (2018), into the discussion (Lines 400 – 401). We have also added comparison with building damage and distance to the coastline in Lines 312-314. We have also added these references to the relevant sections of the introduction.
