

List of changes of the manuscript

Notes that the latest manuscript is generated by **Latex template** while the previous versions were generated by **MS template**. Thus, type-settings in the current manuscript show large difference from the previous versions, especially for the positions of Figures and tables. Even though, the content of the manuscript are the same with the minor revision version except for some minor corrections list as follow:

(Changes are based on the Minor revision version: nness-2019-355-manuscript-version4.pdf):

Minor corrections:

1. Line 80: delete “respectively”
2. Line 213: “key” instead “aim”
3. Line 257: delete “of”
4. Line 341: the caption of Figure 13 updated to “Discharge processes in the centre channel”
