

Dear Editor,

We are pleased to provide the final draft of our manuscript entitled "**Update of the tsunami catalogue of New Caledonia using a decision table based on seismic data and maregraphic records**" having considered your comments about the reference list and the tables:

* Digits

The number of digits for the longitude, latitude and focal depths in the 3 tables have been unified as requested.

* Reference list

Each reference of the reference list has been checked individually:

- some mistakes have been corrected
 - Baillard et al. (2015) has been removed from the list
 - In the text, "Bevis et 1995" has been corrected --> "Bevis et al., 1995"
 - Table 3: "Ioualalen and Pelletier (2017)" has been corrected --> "Ioualalen et al. (2017)"
 - the reference of Soloviev and Go (1974) has been improved
- the format has been unified in agreement with NHESS specifications

Best regards,

The authors.
