Interactive comment on "CCAF-DB: The Caribbean and Central American Active Fault Database" *by* Richard Styron et al.

Paul Mann (Referee)

pmann@uh.edu

Received and published: 22 July 2019

to all:

Overall: the beginning of the paper has a general description with few references and no figure callouts so would be confusing to most readers.

There is a series of USGS active fault maps of various Caribbean countries that might be mentioned in the intro; were these used for this compilation.

The paper is well written and largely up to date although I have added some more recent references in some areas.

No mention of historical seismicity - this might be important for showing the many long

Printer-friendly version

Discussion paper

quiescent areas have a history of large events.

The paper is very comprehensive and deserves publication with minor changes.

I'm attaching the manuscript with my tracked changes.

Nice job and good luck! Paul Mann
