Received and published: 9 December 2020

Regarding Figure 6 description in the text (now is Figure 5) we agree with the reviewer comment, and we have changed "excellent" by "good" agreement.

About the more fundamental observation regarding "Code availability" we will provide the version of the code used to perform all the benchmarks presented in the present study in our web page (as we already do with the open-source of Tsunami-HySEA) or in a repository. We will include the corresponding text in the section "Code availability".
