Interactive comment on "A 30-m scale modeling of extreme gusts during Hurricane Irma (2017) landfall on very small mountainous islands in the Lesser Antilles" *by* Raphaël Cécé et al.

Anonymous Referee #1

I think this is a very good paper presenting a state-of-the-art LES of Hurricane Irma as it affected the French Islands of St. Martin and St Barthelemy. I think the paper can be accepted after attending to the (mainly English-usage) corrections that I've put into the marked-up pdf enclosed below.
