

## ***Interactive comment on “Determination of Heavy Rain Damage-Triggering Rainfall Criteria Based on Data Mining” by Jongsung Kim et al.***

### **Anonymous Referee #2**

Received and published: 30 December 2020

The overall quality of the preprint is low, it is very confused, already starting from the abstract, too detailed.

The description of method, instead is too superficial.

Many paper are mentioned in the introduction, but no results are compared and discussed in relation to the existing literature. It looks more as a technical work for consultancy, than a scientific paper.

The grammar is very low.
