

Dear Editor:

Thank you very much for your hard work concerning our manuscript entitled “Stability evaluation and potential failure process of rock slopes characterized by non-persistent fractures” (ID: nhess-2020-58).

We are very sorry for missing one financial support in the manuscript, which have been added in the text (.docx) with red marked (Page 13: Line 413 and Page 14: Line 417). This modification is not technical but only informative, which has met the handling editor (Filippo Catani)’s approval.

Once again! We sincerely appreciate your work and are really happy that our manuscript was accepted for final publication in NHESS.
