

Interactive comment on “Measuring the seismic risk along the Nazca-Southamerican subduction front: Shannon entropy and mutability” by Eugenio E. Vogel et al.

Eugenio E. Vogel et al.

eugenio.vogel@ufrontera.cl

Received and published: 8 June 2020

I have tried to upload the revised version of the paper but I have not found the way of doing it. By e-mail I sent a copy to the editorial.
