Interactive comment on "Effect of the Slope Angle and Its Classification on Landslide" *by* Seda Çellek

Seda Çellek

sedacellek@ahievran.edu.tr

Received and published: 13 May 2020

Thank you very much for your evaluation. I will make my corrections considering what you say. I translated the article into English at a professional translation agency. You can rest assured that I will correct it to another translator whose native language is English. What you said contributed to me after writing the things that seemed to happen when I wrote the article, and it caught my attention. I just want to share a nice development with you. Researchgate recently added the article to my system. 30 people read it in a short time. A researcher in America congratulated my article and offered to work together. If you give me a chance to publish the article, I will have an opportunity to improve myself, I hope you provide this opportunity to me.
