

Report #4

<p>Please ensure that the colour schemes used in your maps and charts allow readers with colour vision deficiencies to correctly interpret your findings.</p>	<p>We had changed some charts styles and their lines to be clear and readers can distinguish between.</p>
<p>My last suggestion is to insert the name of the case study in the title (as also suggested by one of the referee).</p>	<p>For the title: "Earthquake-induced landslides monitoring and survey by means of InSAR. Case of the 2020 Mila earthquake"</p>
