10th July 2024

Dear Dr. Pascal Haegeli,

Thank you very much for handling our manuscript NHESS-2023-125, entitled A glacial lake outburst flood risk assessment for the Phochhu River Basin, Bhutan.

While proofreading the manuscript, we found a typo in the value of a parameter. That is, in line 35, page 9, the sentence is "Manning's n was set to 0.35". The value we used was 0.035, and we mistakenly described it as 0.35 when preparing the manuscript. We tried our best to prepare the manuscript but failed to correct this to this date.

This parameter is one of the fundamental parameters used for the simulation, and we would like to show the value used in this study.

We would be very grateful if you would approve this correction.

Sincerely,

Ryota Tsubaki   10 July 2024

Ryota Tsubaki, Associate Professor
